PROJECT NAME	AI BASED DISCOURSE FOR BANKING INDUSTRY

The screenshot shows an IDE window with a Python file named `app.py` and a terminal window below it. The code in `app.py` is as follows:

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4
5 @app.route('/Chatbot', methods = ['GET', 'POST'])
6
7 def Chatbot():
8     return render_template('Chatbot.html')
9
10 if __name__ == '__main__':
11     app.run()
```

The terminal window shows the following output:

```
Run: C:\Users\hp\AppData\Local\Programs\Python\Python310\python.exe C:\Users\hp\AppData\Local\Temp\Temp1_Chatbot.zip\app.py
* Serving Flask app 'app'
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

The IDE interface includes a menu bar (File, Edit, View, Navigate, Code, Refactor, Run, Tools, VCS, Window, Help), a toolbar, a sidebar with Project, External Libraries, and Scratches and Consoles, and a status bar at the bottom showing Version Control, Run, TODO, Problems, Terminal, Python Packages, Python Console, and Services. The status bar also displays the file encoding (1:1, CRLF, UTF-8), indentation (4 spaces), and the Python version (Python 3.10).
